

QL-DMX18

DMX-512 SPLITTER/ISOLATOR MODULE

The QL DMX Splitter module is a simple DMX-512 signal splitter module. Each bus of DMX-512 can connect to up to 32 devices. If there are more than 32 devices, a signal splitter/isolator is required. The module is also used in places where a star connection is required between the DMX-512 buses. The module comes in rack mounting form with one pair of DMX in connector with 8 split outputs.

- 8 way DMX-512 splitter
- Each output is photo-isolated

Specifications

Power Supply
100-270V AC

Power Requirement
1A

Protocol
DMX-512

Connectors
DMX-512 IN : 1 no. 5 pin male XLR connector socket
DMX-512 out : 8 nos. 5 pin female XLR connector socket
Power in : 230V AC 10A fused input ST3 socket

Switches
Mini Red rocker switch for power

Safety Regulatory Compliance

CE

Environment

Ambient Temperature : 0°C to 50°C
Relative Humidity : less than 80%

Dimensions

483mm (W) x 225mm (H) x 44mm (D)

Weight

2.5Kg
