

The QL-LPRG is a handheld programmer for the Qlite RFID locks series. This device is needed to program each lock individually once to allocate room number to each lock. The device also reads the audit trail from the locks and connects to a PC to backup the records.

Specifications

Power Supply

3.7V 1600mAh Lithium battery

Power Requirement

Standby : <2mA

Operational : <100mA

Memory

RAM 64MB, Flash 128MB

Display

2.8 inch QVGA (230*320 pixel)

64K color TFT-LCD, LED backlit

Keyboard

27 keys including 8 customized function keys

Expansion Slot

Supports max 4GB TF card

Interface

Mini USB, RS232

RFID

HF 13.56MHz, ISO14443/ISO15693

LF 125KHz ISO11784

Environment

Operating Temperature: -10°C to 60°C

Relative Humidity : less than 95%

Dimensions

180 mm (L) x 68 mm (W) x 33 mm (D)

Weight

400 g (including battery)
