

The QL-LWP1 is a water proof RFID mortised lock. This model is perfect for use in resorts where each room is a separate entity in the open and prone to rains hitting the entrance at times for example beach houses.

In hospitality applications where the aesthetics of the property is top priority, there is a need for the used hardware to blend into the design so seamlessly that it becomes virtually invisible to the user. This model not only does that but combines the latest technology of contactless Radio Frequency Identification (RFID) electronic lock along with its trendy look to give a more secure environment. The sleek and trendy lock series allows designer to choose from a wide range to maintain the essence of their design intact.

The lock is not only easy for the guest to operate; it is as simple for the operator to maintain. The lock series gives the operator complete control over the access to areas and flexibility of allowing, blocking, overriding of any card. It also allows the operator to offer a single access card to the guest for different areas.

- *Easy operation*
- *Wireless stand alone lock*
- *Realizes 95% of online lock system functions*
- *Low battery voltage warning*
- *Self error detecting and indication by beep and LED*
- *Improper lock warning*
- *Dead bolt on the inside*
- *Opening from inside handle retracts latches as well as deadbolt*
- *Individual or Master cylinder option available*
- *Override computer key can be generated for emergency use*
- *Receptionist card issuing records printable*

Specifications

Power Supply

4 pcs #5 AA Alkaline Batteries
Average 18 Months' duration

Power Requirement

Stand by load : < 10 μ A
Working load : 100 – 150 mA

Technology

RFID
Compatible with Temic RF

Material

Water proof and Fire retardant
Stainless Steel with PVD coating
lasting more than 10 years
Panel : SS304
Handle : SS304
Mortise : Cooling Steel
Cylinder : Pure Copper

Mortise Standard

ANSI

LED Status Indicators

Single color LED on reader with dual
beep tone for status

Environment

Ambient Temperature :-50°C to 60°C
Relative Humidity : less than 90%

Safety Regulatory Compliance

CE, FC

Dimensions

290mm (L) x 60mm (W) x 34mm (D)

Weight

2.5 Kg

- Lock operation record printable
- Multiple operators with different card issuing authorizations
- Lost guest card suspension facility
- Definable card validity time
