

QL-SPR-180

passive infrared Occupancy Sensor

The QL - SPR-180 is 180 Degrees passive infrared (PIR) Sensor . QL- SPR 180 is a new type of energy-saving lighting switch, it adopts high sensitivity detector,It gathers automatic, convenient, safe, energy-saving, practical functions; It has wide detection range made up of up and down, left and right service field; It utilizes human motion infrared rays as control signal sources, when one enters the detection field, it will start the controlled load at once; It can identify day and night automatically; It is easy to install and its usage is wide;

Specifications

Power Supply

220-240V AC, 50/60Hz

Detection Range

PIR Coverage -8 Mtr

Hold Time Setting

5s, 30s, 180s, 300s, 15min and 30 min

Daylight Threshold Setting

Up to 500 lux

Switched Power

1000 W Max

Detection Angle

180°

Mounting Height

Max. 2.5m

Environment

Ambient Temp : -20°C to 60°C

Relative Humidity : less than 80%

IP Rating

IP20

Safety Regulatory Compliance

CE

Dimensions

50 mm x 80mm x120mm

Weight

160g
